WELCOME

ESREF 2015, the 26th European Symposium on Reliability of Electron Devices, Failure Physics and Analysis, will take place in Toulouse (France) from 5th to 9th October 2015.

This international symposium continues to focus on recent developments and future directions in Quality and Reliability Management of materials, devices and circuits for micro-, nano-, and optoelectronics. It provides a European forum for developing all aspects of reliability management and innovative analysis techniques for present and future electronic applications.

A word from the conference chairs

ESREF 2015 will be held in Toulouse - world center for aeronautics with Airbus assembly line, European capital of the space industry and number 1 in France for embedded electronic systems. Toulouse, called "Ville rose" (Pink city) for its characteristic architecture based on terra cotta bricks, combines a strong living spirit with a brilliant past. It is the third French university with more than 90000 students and is definitely turned towards the future with a large number of cutting-edge businesses in aeronautics, information technologies and spatial industries, as well as many research institutes. Hosting ESREF 2015 in this rich environment is a great opportunity since reliability in these particular applications is a very hot topic with strong challenges such as zero ppm failure and harsh environments. For this 26th edition, in addition to the core topics of the conference, we would like to involve the major actors of aeronautics, space and embedded systems industry to provide specific topics such as radiation hardening, very long-term reliability, high/low temperature challenges, obsolescence and counterfeit issues, wide bandgap power devices for the more electric aircraft and other embedded system applications. In the continuity of previous conferences, ESREF 2015 is also hosting several workshops (EFUG, EUFANET, POWER...) and welcomes new ones related to these specific topics.

We are looking forward to welcoming you for a memorable experience!

Yours sincerely
